

Personal Contributions

Yuxuan(Jonathan) Chen

I'm in charge of the coding part of the backward stepwise variable selection and the exhaustive search. Juetao implemented the forward stepwise variable selection, and I collected the results and completed the write-up for variable selection. After the data analysis part is done, I wrote the discussion portion of the report. When the main content of the report is finished, I went over the entire report and polished the wording for a better readability and consistency. I also added the abstract page for the paper.
